To register for a class; contact Scott Schmidt at [scott.schmidt@stuckeyinsurance.com](mailto:scott.schmidt@stuckeyinsurance.com) or 602-264-5533, ext. 137.

## Stuckey Insurance 2014 XL Education Course Descriptions

**Cow County Fairgrounds Case Study - 2.0 AIA/CES Units Description:** Out-of-state architect engaged local SE to design the structural foundations for the complex's pre-engineered metal buildings. SE began work after a letter proposal. Snow load calculations were made for the foundations based on the type of building occupancy. Four years later, when the roof on one of the buildings deflected after a massive blizzard, the calculations for all of the structures came into question. County asserted a claim for \$27 million to make things right.

*\*\*Attendance Requirement for Cow County Fairgrounds: More than 50% of the firm's principals, AND more than 50% of the firm's professionals.*

**It's All Downhill Case Study - 2.0 AIA/CES Units Description:** An out-of-state LA firm with experience in road projects won an RFP to redesign the mass transit route to bring more shoppers to the mall. The project called for snowmelt technology and easy access to subsurface utilities, all while maintaining the Old World look of the mall. The LA retained a mechanical engineer (ME) subconsultant for the snow removal system design/technology. To save money, the ME recommended an innovative use of a product. Construction completed in the off-season and the mall opened as scheduled. Everyone was happy...until the concrete pavers on the roadways started to shift. The city brought in an expert who opined that it was the result of the "innovative" use of materials. The city sued the design team for \$4 million.

*\*\*Attendance Requirement for It's All Downhill: More than 50% of the firm's principals, AND more than 50% of the firm's professionals.*

**Risk Drivers Workshop – 2.0 AIA/CES Units Description:** Our flagship workshop has been updated and rebranded. Risk Drivers demonstrates how the A/E and professional liability industries interrelate. And it explores the technical and non-technical causes of claims.

*\*\*Attendance Requirement for Risk Drivers Workshop: More than 50% of the firm's principals, AND more than 50% of the firm's professionals.*

**Understanding Ethics Workshop - 2.0 AIA/CES Units Description:** Helps A/Es understand the topic of ethics as it relates to the design professions. Participants define ethical behavior, review professional association ethical canons, explore models for ethical decision making and develop strategies for ethical responsiveness.

*\*\*Attendance Requirement for Understanding Ethics Workshop: More than 50% of the firm's principals, AND more than 50% of the firm's professionals.*
