Why Online Enrollment?

Stuckey Insurance has partnered with EaseCentral, an online enrollment system that streamlines the enrollment process, making you and your employees lives a little easier.

Online Enrollment helps to reduce errors often caused by paper forms by creating digital files. Employees enjoy EaseCentral because they can easily compare their options, access all important documents, and enter their personal information one time instead of writing it multiple times for each carrier.

Employees have access 24/7 to plan details and educational resources about their health benefits

New Hires:

The process of adding a team member to your company can often be long and stressful. Online enrollment helps to take one thing off your plate by allowing the employee to enroll online on their own time. Once a new hire is enrolled you as the employer receive a summary breakdown showing the cost and plan selections.

Online enrollment allows you to easily manage your employee benefits and quickly generate and view reports such as payroll deduction reports, enrollment summaries, census reports or consolidated billing reports.
